Automatic replenishment of drugs

Supports automatic import of large quantities at once, such as unorganized placement and stacking.

Auto-dispensing

With the high-speed dispensing system, the robotic arm can dispense up to 2,000 boxes per hour, reducing manual errors.

Large capacity

Occupying an area of only 7 square meters, it can store about 3,000 boxes of drugs.

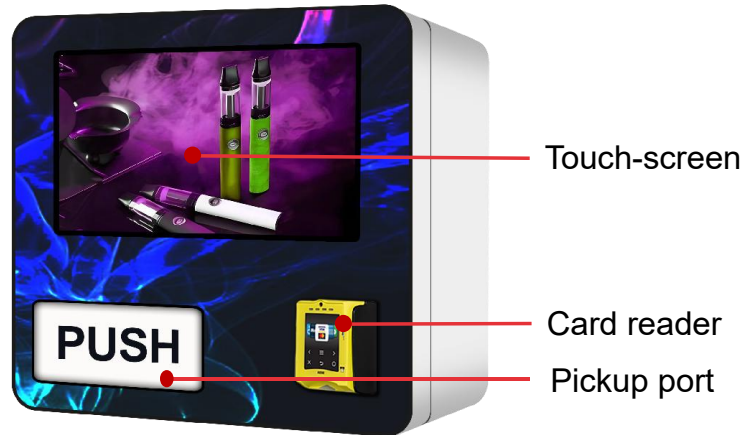

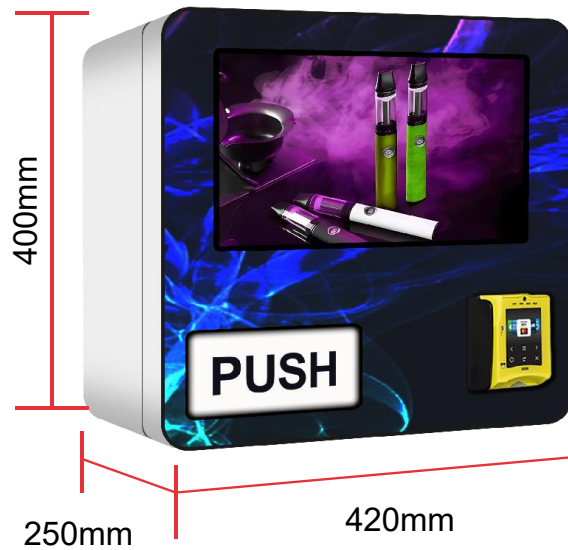

Prioritizes recent medications

AI scanning automatically identifies the lot number and expiration date of drugs, and the algorithm of prioritizing the use of recent and expired drugs automatically shields and cleans up expired drugs regularly to avoid waste and safety hazards.
